Same readings, same graph, every 5 s cycle
Rules engine
robust z-score per metric median and MAD, bad direction only
rule score / 3 = x line
ML engine
each service against what the load predicts: own and symptom
level, facts, random walk
trend forecast, learned cascade
Hybrid fusion
alarm = ML alarm OR rules >= 1.25 x line OR fact
source = ML ranking, facts first
Active engine (top-bar switch)
decides the incident
Detection engines page: detected, computed and predicted, side by side
